- 20' Green 30 second per foot safety fuse
- 20' Pink 2 second per foot fuse

## Assembly Instructions

Assemble as pictured below. We recommend using a high quality tape such as gorilla tape for all fusing connections. Lay fireworks on ground in proper order and start by fusing fountains first and work your way towards the finale / 3" display shells following the recommended spacing. Make sure to leave about 6" in front of fountains for ample time to retreat to a safe distance. Follow the measurements after the product listed at left, 12" means there should be 12" of green safety fuse between that items tape connection and the next items tape connection. When joining one fuse to another always face end of joining fuse towards the direction the fire will be coming from. Secure all items by driving a wood grade stake into the ground and wrap 2x with gorilla tape to prevent tipping. We recommend 200' distance between the fireworks and the spectators or any structures. DO not approach fireworks for 5 minutes if fuse burns out to relight. Follow all other manufacturers instructions on label.

# The Block Buster Display

Duration: 6 minutes (Non Stop)  
 Cost: \$534.80 (Free Shipping!)  
 Difficulty: **Easy** Mid Pro  
 Instructions: Packed in Box

- =30 second per foot green fuse
- = 2 second per foot pink fuse
- = tape joint / fuse intersection

Description: The Block Buster Display is an easy to set up, single ignition point display that lets you light one fuse and step back and watch the show with friends and family! The Block Buster starts off with lava fountains then goes into a pair of 200g cakes and continuously builds in intensity until it ends with a mid blowing 500g finale that layers the sky with color, crackle and giant brocades. The cheers will be heard for miles as everyone else will cease shooting to watch your show!
